

**QUALITY FOR LIFE**

## **Certified Prosthetist & Orthotist or Orthopaedic Technician**

### **Position:**

- To provide technical fabrication support to internal and external colleagues
- To provide clinical and product application support to internal and external colleagues
- To provide clinical services operational and procedural conduct support to internal and external colleagues
- The role will be a combination of training and direct operational involvement
- There will be occasional support requests with a more direct sales focus

### **Location:**

- Korea (Seoul) – Reference Number 39/2006

### **Profile:**

- Internationally recognized qualification in both Prosthetics and Orthotics – where national education practices allow an intermediary qualification may be acceptable.
- Appropriate practical experience of both fabrication and clinical applications in a developed healthcare environment. Preferably including upper & lower extremity prosthetics and orthotics. Less experience may be appropriate if the candidate can demonstrate particular skills in one area of practice or other attributes relevant to a particular opportunity – such as language, national experience or presentation skills.
- Good spoken and written national language or English as well as cultural sensitivity and flexibility.
- Good computer skills.
- Appropriate references.
- Good presentation skills.
- The ability to self-manage and initiate improvements.
